Mammogram Screenings with 3D tomo Self-pay

**\$130**

Do you have insurance and over 40 years old?

Mammogram screenings are covered at 100%!

**Annual screenings prevent invasive breast cancer.**

# 3D Mammography benefits

Increase in early detection

Fewer false positives

**Traditional 2D mammography** produces only two images of each breast, a side-to-side view and a top-to-bottom view (**4** images).

**3D mammography** produces many X-Ray images of the breast from multiple angles to create a digital 3-dimensional rendering of internal breast tissue (**300** image slices on average). This allows our radiologists to view the breast in 1 millimeter 'slices' rather than just the full thickness from the top and from the side.

**Save on the Cost of Breast Imaging with Us.  
We Never Compromise Quality.**
